Buyers
Sellers

The 2nd version of Plast Future East : PFE-2016 offers excellent opportunities for domestic and international exhibitors & visitors to come and participate in a trade fair targeting the eastern states of India, and reap the benefits of the fastest growing region in India.

SEMINAR THEMES

Advancement in Material & Processing technology
Energy wise
Sustainability

FUTURE PROSPECT OF PLASTICS INDUSTRY IN EASTERN INDIA

The plastics industry in eastern India is growing fast. The per capita consumption of plastics in the eastern region consisting of Odisha, West Bengal, Chhattisgarh, Bihar, Jharkhand, Assam & North-eastern states, is still one third of the national consumption. This poses a tremendous growth potential for the eastern region.

Eastern India will have a strategic advantage in the near future as both upstream and downstream is coming up in the region coupled with lower power cost and investor-friendly IPR announced by the state government. The upcoming IOCL petrochemicals complex at Paradeep, Assam Gas Cracker Project and Brahmaputra Cracker & Polymer Limited, along with the existing Haldia Petrochemicals, would eventually play a major role in shifting the focus of plastic industry to eastern states of India and become the hub for future growth pushed by supply driven demand growth.

ADVANTAGE ODISHA

Odisha has taken a series of steps for improving "ease of doing business" in the state. It is one of the pioneer state to include various official clearances, permissions and allotments under Odisha Public Service delivery Act, which defines time line for grant of many permissions for setting up of an industry. Odisha has included Plastics & Polymer as one of its priority sector in the recently announced IPR 2015.

The Balasore Plastics & Polymer cluster, backed by modern common infrastructures developed by the NOCCI already boasts of a wide product mix and vibrant eco system, for attracting many more industry especially in plastics

Similarly the green field Paradip Plastics Park is poised to attract many plastics units, and drive further growth in the Paradeep-Balasore corridor, as part of the PPCIR (Petroleum & Petrochemicals Investment Promotion Region).

ABOUT THE VENUE

Balasore International Expo Centre BIEC is a new infrastructure built with world class facility for holding trade fairs, exhibitions, and conventions, at Balasore (Chandipur on sea) the humming coastal town of northern Odisha, almost in the centre of 3 state capitals Bhubaneswar, Kolkata and Ranchi, and many other economic hubs, such as Jamshedpur, Kharagpur etc.

The BIEC has a 35,000 sq ft air-conditioned exhibition hall, with all facility to accommodate 150 octa-norm stalls of 9 sq meter area each. In addition, ample open area to park vehicles, and arrange open air exhibition is also available.

The BIEC facility is in a 10 acre campus of the NOCCI Business Park, having star rated accommodation, recreation, cottage industry exposition and open air theatre, modern office facility, close to NH-5.
